## HIGH PRAISE FOR PETER RUSSELL'S LATEST WORK...

"The first solid attempt to clearly identify the paradigm that is emerging—an integration of the scientific paradigm that is dominant in the world now, and the spiritual traditions represented in paradigms dominant in the past... I predict this book will spread like wildfire. For many of us it is a fulfillment of a dream we didn't know we had."

Michael L. Ray, Stanford Business School, author of *Creativity In Business*

"What an extraordinary, marvelous, powerful, profound piece of work."

John L. Petersen, President, The Arlington Institute, author of *Out of the Blue*

"A modern hero's journey—a record of a courageous traveler who has ventured where scientists aren't supposed to go, who has gained great wisdom and returned to share it. This book will be invaluable to millions who are seeking to harmonize intellect and intuition, science and spirit in their lives."

Larry Dossey, MD, author of *Recovering the Soul* and *Reinventing Medicine*

"A brilliant synthesis of the empirical and spiritual views of reality."

Harville Hendrix, author of *Finding the Love You Want*

"Profoundly insightful from both a theoretical and personal perspective. A story of the development of western thought on the one hand, and of a very thoughtful individual's personal struggles to reconcile his love and respect for science with his growing spiritual awakening. Far more than most other books on the subject, *From Science to God* identifies a possible basis for true reconciliation between science and spirituality."

Winston Franklin, President, The Institute of Noetic Sciences

"The best book Peter Russell's ever written...will get through to the Harvard Business School types."

Hazel Henderson, author of *Building A Win-Win World* and *Paradigms in Progress*

"At a time when Osama Bin Laden and the Taliban have given God a bad name it is a pleasure to read Peter Russell's beautifully written book endorsing the transcendental view of life. Based on his own experiences as a mathematician and as a mystic he charts the route from materialism to meditation and has a convincing explanation of the meaning of such diverse items such as gravity, relativity, quantum theory, light and consciousness. And a new and satisfying interpretation of God."

Napier Collyns, Co-founder of the Global Business Network

"As usual Peter Russell has brought the highly complex into the divinely simple and helped us make the transition from the materialistic view of nature, to the illumination of the true nature of reality."

Barbara Marx Hubbard, author of *Conscious Evolution*
